1 Company Set-up

1.1 Overview

In order to utilize the French functionality, the company must be set up as using the French localization.

1.2 **Define localization**

- Open the *Company* page.
- Search for the company.
- Select "France" in the drop-down list in the **Localization** field and **Save**. Note that this cannot be changed once transactions are created for the company.

Application Base Setup > Enterprise > Company > Company >								
Company dan france	- Dan France 🔻 1 of 4							
Update Company	Update Company Translation New Cor	mpany	•					
Company	Name	Association No	Created By

1.3 Select Localization functionality

Specify which functionality to use.

- Open Localization Control Center
- All functionality available for France is presented in the list. Enable/Disable the functionality based on the requirements for the company. Note that some functionality is mandatory and cannot be disabled.

Application Base Setup > Enterprise > Con	npany > Company > Localization Control Center 🖉

2 French VAT Returns (CA3)

2.1 Overview of Legal Requirement

All French VAT taxpayers must file a VAT return (CA3 3310) on a monthly basis. The CA3 return information is manually entered on the tax authority's web portal.

The CA3 VAT return consists of three parts,

- <u>Part (A) Amount of Operations Carried Out</u> All the transactions are carried out under the sub sections of 'Taxable Transactions' and 'Non-Taxable Transactions (Exempted)'.
- 2. Part (B) VAT to be Paid

Summary of each sales category VAT to be paid under the tax rate imposed by the tax authority. In addition, it will comprise a subsection to specify the VAT deductible part which can be deducted due to purchases of all non-capital and capital transactions.

3. VAT Credit

VAT Net Due and if the company benefits from the VAT Credit, those amounts will appear in this section.

2.2 Process Overview

IFS Cloud standard tax report process based on tax transactions and tax ledger is used.

2.3 **Prerequisites**

The following prerequisites should be met to generate a CA3 VAT Return report.

- The company must be set-up to use the French localization, see the Company Set up chapter. The **French Tax Reports** localization functionality must be enabled on the **Company/Localization Control Center** tab.
- Taxable transactions must be updated to the general ledger and to the tax ledger.

2.4 **Define Basic Data**

To fetch the data into a tax template, a new Tax Template Field Control needs to be defined.

Available options for Selection Based On criteria for Tax Template Field Controls are,

- Tax Codes (Option 01)
- Subgroups (Option 02)

In **Tax Template Field Control Template** fields are connected to either **Tax Codes** or **Subgroup** depending on which option was chosen in **Selection Based On**. Therefore, before defining **Tax Template Field Control**, either **Tax Codes** or **Tax Group** must be defined.

2.4.1 TAX CODES

In the **Tax Codes** page define the tax codes needed for the transactions. This is standard IFS Cloud functionality, find more details in the IFS Cloud Documentation.

		1	Tax with no reduction	Tax	25	100	1/1/2019	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	
		1.10	Sales, Benefits of servi	Tax	8.5	100	1/1/2019	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	
		1.11	Sales, Benefits of servi	Tax	2.1	100	1/1/2019	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	

Note: Transactions must be updated to the general ledger and tax ledger to be included in the tax report. This is done via Financials/General Ledger/Update GL Vouchers and *Financials/Tax Ledger/Fetch Tax Ledger Information*.

2.4.2 TAX GROUP

If the tax template fields are to be mapped with tax sub-group IDs. Define Sub Groups with **Sub Group ID** and a **Description**. In **Sub Group Details**, the Sub Groups can be connected to Tax Codes. A subgroup can be connected to multiple tax codes, one per row. However, a tax code can only be connected with one subgroup. **Tax groups** are created on the *Financials/Tax Ledger/Basic Data/Tax Group* page. This is standard IFS Cloud functionality, find more details in the IFS Cloud Documentation.

2.4.3 TAX TEMPLATE FIELD CONTROL

Go to *Financials/Tax Ledger/Basic Data/Tax Template Field Control* to connect tax codes or tax subgroup IDs (based on the Option selected) with the template fields. The connection between **Template Field** and **Tax Code** or **Sub Group ID** decides which transaction will be shown with which template field in the report.

If **Selection Based on** is chosen as "**Tax Codes**" (Option 01), **Template Fields** must be connected with the **Tax Codes** as follows.

Тах	۲	emplate Fie		001 - French V	AT Return R	eport - Tax Trar	saction	•

	:	08 - 08 Monta	opérations nt Base - Tai	imposables 0981 ux normal 20% 0207	(3) 1.10; 1.1	1; 2.10			

The two figures above are examples of setups. There are more fields available, these Template Fields can be removed or added and connected to Tax Code or Sub Group ID as needed for the tax report.

For IFS Cloud 23R1, existing Template Fields have been renamed and more fields have been added to comply with the French Tax office's requirements applicable from year 2022. See Appendix for all changes.

Enter *Financials/Tax Ledger/Basic Data/Tax Templates/Tax Template Field Control Basic* to check the full list of Template Fields. To find more details about each Template Field, select a Template Field and then press **Details**.

2.5 Define Tax Report

Go to *Financials/Tax Ledger/Tax Report* and click on **New** to create a new tax report. Find more information in IFS Cloud Documentation.

Enter **Report No** and **Description** accordingly and select the **Template ID** as **GFR001**. Other fields are not mandatory.

2.6 Generate Tax Report

2.6.1 AUTOMATIC TAX PROPOSAL

Go to *Financials/Tax Ledger/Automatic Tax Proposal* to generate the French VAT Return report from the defined **Tax Report**.

Click **New Tax Proposal** on the *Automatic Tax Proposal* page and select the report defined for French VAT Return. Next, select the **Period /Date Range** for the tax proposal. Click **OK** to create the proposal.

<		New	Tax Propos	sal	
Proposal ID	Description

New Propose Correction I tatus Created dentity Range	sal Proposal	Correction Type Supplementary l	Report		

Click the command button to go to **Details** to see the transaction details in the tax proposal.

To print the tax proposal, use the command button and click **Print Preliminary Report**. Then click **Preview** to view the report on the screen.

Click **Acknowledge** and then click on the **Print Definitive Report** button to create the report. The report is created in .pdf format. Use the report as a base to manually update the numbers on the tax authority's web portal.

2.7 **Delimitations**

No file is created, the report is created in .pdf format. Use the report as a base to manually update the numbers on the tax authority's web portal.

3 Declaration of fees (DAS2 Reporting)

3.1 Overview of Legal Requirement

Companies in France that do business with independent consultants must declare all the payments made to each independent consultant to the tax authorities each year.

The information is reported via a .txt file. The file contains company level information, supplier level information, tax transactions and payment totals.

3.2 Solution Overview

The DAS2 file is generated from the *Financials/Tax Ledger/Automatic Tax Proposal* page. New Tax Template (GFR002), New External File type, and Template (TaxRepFrDas2) have been defined to create the DAS2 file.

Apart from the file type and template, a certain set of basic data needs to be set up in order to get the required information for the DAS2 text file.

3.2.1 PROCESS OVERVIEW

The standard tax file creation flow in IFS Cloud is used in this solution.

3.3 **Prerequisites**

The company must be set up to use the French localization, see chapter Company Set Up. The localization functionality **French Tax Reports** and **Address Specific Tax Registration Numbers** must be enabled on the **Company/Localization Control Center** tab.

Supplement Tax Withholding should be disabled in the Company/Tax Control/Invoice sub tab.

3.4 **Define Basic Data**

3.4.1 DEFINE INCOME TYPE

The supplier income types used in France must be defined in *Enterprise/Tax/Income Types* page. Supplier income types are used to categorize payments to suppliers for tax reporting and withholding purposes.

Income Type ID	Description
1. H	Honoraires, vacations (Fees, Vacations)
2. C	Commissions (Commissions)
3. CO	Courtages (Brokerages)
4. R	Ristournes (Rebates)
5. JP	Jetons de presence (Attendance Fees)

6. DA	Droits d'auteur (Copy Right)
7. DI	Droits d'inventeur (Property Right)
8. AR	Autres rémunérations (Other Remuneration)
9. I	Indemnités et remboursements (Allowances & Refunds)
10. AN	Avantages en nature (Benefit in Kind)
11. RS	Retenue à la source (Withholding Tax)

Income Types

	.0	ше туре	-5				
	=	7 2 ~	+ /				
~	:	Country Code	Income Type	Description	1099 Threshold Currency	1099 Threshold Amount Report Code	Tax Withholding Code
	:	FR	Н	Fees, Vacations	EUR	0.00	Optional
	:	FR	С	Commissions	EUR	0.00	Optional
	:	FR	CO	Brokerages	EUR	0.00	Optional
	:	FR	R	Rebates	EUR	0.00	Optional
	:	FR	JP	Attendance Fees	EUR	0.00	Optional
	:	FR	DA	Copyright	EUR	0.00	Optional
	:	FR	DI	Property Right	EUR	0.00	Optional
	:	FR	AR	Other Remuneration	EUR	0.00	Optional
	:	FR	1	Allowances & Refunds	EUR	0.00	Optional
	÷	FR	AN	Benefit in Kind	EUR	0.00	Optional
	:	FR	RN	Withholding Tax	EUR	0.00	Optional

3.4.2 DEFINE REPORT CODES

In DAS2 Reporting, some supplier income types must be reported with specific information.

Income Type ID	Report Code
1. AN	N – Nourriture (Food)
	L – Logement (Accommodation)
	V – Voiture (Car)
	A – Autres (Others)
	T – Outils issus des NTIC (Implements derived from NTIC)
2. 1	F – Allocations forfaitaires (Lump-sum Allocation)
	R – Remboursements (Refunds)
	P – Prise en charge directe par l'employeur (Rules for takeover by the
	"employer")
3. RS	TR – Taux réduit (Low rate)
	D – Dispense (Exemption)

This information must be defined under *Financials/Supplier Invoice/Basic Data/Report Codes* for *Tax Lines, Withholding* page.

Report Codes for Tax Lines, Withholding							
🧹 🗄 Country Code 🛛 Repo	port Code	Description	Tax Function				
□ : FR N		Food	Income Tax Withhold				
E FR L		Accommodation	Income Tax Withhold				
🗆 🗄 FR 🛛 V		Car	Income Tax Withhold				
E FR A		Others	Income Tax Withhold				
🗆 🗄 FR 🛛 T		Implements derived from NTIC	Income Tax Withhold				
FR F		Lump-sum Allocation	Income Tax Withhold				
E FR R		Refunds	Income Tax Withhold				
□ : FR P		Rules for takeover by the "employer"	Income Tax Withhold				
E FR TR		Low rate	Income Tax Withhold				
D : FR D		Exemption	Income Tax Withhold				

3.4.3 DEFINE BUSINESS ACTIVITY CODE AND PROFESSION OR ACTIVITY

In the DAS2 Reporting, it is mandatory to have a Business Activity Code (APE/NAF) and Profession or Activity for each supplier included in the DAS2 file. Therefore, the business activity code and profession must be defined as property codes in the *Financials/ Supplier Invoice/ Basic Data/ Invoice Property Code* page.

Property Code	Description
APE/NAF	Business Activity Code
PROFESSION/ACTIVITY	Name of the Profession or Activity

Invoice Property Codes						
:=		7 2 - 1				
~	÷	Property Code	Description			
	÷	APE/NAF	Business Activity Code			
	:	PROFESSION/ACTIVITY	Name of the Profession or Activity			

3.4.4 COMPANY LEVEL BASIC DATA – ADDRESS

Open the *Company/Address/ General Address Information* sub tab. The Address Presentation must have the following items.

- Address Line 1 Number of the street/lane must be entered in Address Line 1.
- Address Line 2 Must be used to enter B, T, Q, C
- Address Line 3 The rest of the address must be entered in Address Line 3.
- Zip Code
- City

3.4.5 COMPANY LEVEL BASIC DATA - DAS2 REPORTING

The following information which is used for DAS2 Reporting must be defined in the sub tab *Enterprise/ Company/ Address Tab/ Tax Information.*

3.4.5.1 SIRET, SIREN and NIC Number

These Tax ID numbers must be defined under the **Address Specific Tax ID Numbers** section. This section is enabled only when the localization parameter "Address Specific Tax Registration Numbers" is enabled in the French Localization.

- SIRET Number 14-digit Number (Systeme Informatise du Registre Etablissements)
- SIREN Number 1st nine digits of the SIRET Number
- NIC Number Five digits (from the 10th position) of SIRET Number of Legal Entity and Legal Reporting Unit.

The details below must be defined under the "DAS2 Reporting Parameters" section.

- **Threshold Amount**. For DAS2 Reporting, there is a threshold of EUR 1200 and only the amounts that exceed the threshold amount must be reported. When creating the tax proposal, the threshold amount will be compared with the total payment for each supplier and only the payments that exceed the threshold will be added to the Tax Proposal.
- APE/NAF Code
 - The Business Activity Code must be entered.
- File Type The File Type ID must be defined in this field. The relevant file type IDs are listed below.
 - H Hospital
 - F Local Community
 - G Agricultural Sector
 - U Unemployment Insurance Funds (Assedic)
 - X All registrants with only fees
 - **B SNCF**
 - **C EDF**
 - D LA POSTE

- Y Other Public Establishment
- E Collieries
- J CNRS
- K Ministry of Defense
- **L RATP**

• DADS Type

- DADS Type must be defined in this field. The relevant DADS types are listed below:
- **Type 0** The establishment pays wages and the establishment pays fees and reports them on the same file.
- **Type 1** The establishment doesn't pay wages and the establishment pays fees and reports them in the same file.
- **Type 2** The establishment pays wages and the establishment doesn't pay fees.
- **Type 3** The establishment doesn't pay of wages and the establishment doesn't pay fees.
- **Type 4** The establishment declares fees only.
- **Type 5** The establishment pays wages and the establishment pays fees but reports them separately.
- **Type 6** The establishment doesn't pay wages and the establishment pays fees and reports them in the same file.
- **Type 7** The establishment declares only employee share ownership.

Note: In IFS Applications 10 version, this information was defined in a sub tab named *DAS2 Reporting* located in the *Enterprise/ Company/ Tax Control* tab. This was changed in IFS Cloud, as described above.

Application Base Setup > Enterprise > Comp.	> Application Base Setup > Enterprise > Company > Address 😴

3.4.6 COMPANY LEVEL BASIC DATA - TAX CODES

The DAS2 report considers the transactions created for PP49 posting type. Therefore, in order to create a withholding posting (Posting Type PP49) for a supplier payment, a withholding tax code with the tax method **Payment** must be defined in the *Accounting Rules/Tax / Tax Codes* page.

Note: If there are suppliers who do not get subjected to withholding tax, but get subjected to DAS2 Reporting, those suppliers have to be defined for tax with 0% tax withholding code. Therefore, 0% tax code with the tax method **Payment** must also be defined on the **Tax Codes** page as a prerequisite. (Find more information in chapter Supplier Level Basic Data - Connect Tax codes for Supplier connect tax codes to supplier)

• >	• > Accounting Rules > Tax > Tax Codes 🕄 Company Nipuni's Test Company

3.4.8 SUPPLIER LEVEL BASIC DATA – ADDITIONAL TAX ID NUMBERS

Additional tax ID numbers: All SIRET, SIREN, and NIC numbers of each supplier must be defined as Address Specific tax ID numbers in the *Enterprise/Supplier/Address tab/Document Tax Information* sub tab. (Note: The main column must be reserved for Tax Registration Number/s)

Note: In IFS Applications 10 version, this information was defined in the *Enterprise/ Supplier/ Address tab Document Tax Information* sub tab. In IFS Cloud this is changed as described above.

3.4.9 SUPPLIER LEVEL BASIC DATA - BUSINESS ACTIVITY CODE AND PROFESSION OR ACTIVITY

Define the business activity codes, professions, or activities in the **Supplier/Invoice** tab and **Properties** sub-tab. The property codes created for business activity code (APE Code), the profession or activity must be defined for all suppliers. It is mandatory to follow the sequence described below when entering the property codes.

First, enter the property code created for the Business Activity (APE Code), then enter the property code created for the profession or activity.

3.4.10 SUPPLIER LEVEL BASIC DATA - SUPPLIER LEVEL BASIC DATA - TAX WITHHOLDING BASE

The amounts to be declared in the DAS2 report must include VAT. Therefore, the tax base amount in each supplier withholding tax transaction is considered as the payment amount. In order to get VAT inclusive amount for the DAS2 file, the withholding base must be set as "Actual Paid" for each supplier in the *Enterprise/ Supplier/ Invoice tab/Tax Withholding Reporting* command button.

Application Base Setup > Enterprise > Supplier > Supplier > Involce > Tax Withholding/Reporting

3.6 Create a Tax Proposal

Use standard functionality to create the tax proposal for the previously defined tax report. Either period or date can be used for the date range of the report.

3.7 Acknowledge the Proposal

Use standard functionality to acknowledge the tax proposal by using the context menu option.

3.8 **Print Definitive Tax Report**

Use standard functionality to print the definitive tax report and the text file will be created with the format required by the tax authority. See the example below:

4 French Payment Format

4.1 Overview of Legal Requirement

Businesses in France are using specific payment formats for bank transfers that are not covered by SEPA or ISO 20022 standards. French commercial electronic transfer format (PAYEXT D96 A) and French Foreign/International Electronic Fund Transfer format (CFONB 320) formats are the most used payment formats for supplier payments.

- PAYEXT D96 A is used for the supplier payments done in EUR.
- CFONB 320 is a French standard, defined by the French Committee for Banking Organization and Standardization, and meeting the needs of the French Banking Association (AFB) in terms of foreign transfers.

4.2 **Process Overview**

4.3 Prerequisites

The company must be set up to use the French localization; see the Company Set-Up chapter. The **French Payment Formats** localization functionality must be enabled on the **Company/Localization Control Center** page.

4.4 **Define Basic Data**

4.4.1 COMPANY CASH ACCOUNTS

Go to *Financials/Payment Basic Data/Cash Book/Cash Account* to define the company cash account number for the payment institute.

● > Fina	ncials > Payment Basic D	ata > Cash Book > Cash Accounts 🛛 🕄											Company FR1CMP
Casł	Accounts	5											
=	7 2 +	1							International	Statement			
~ 1	Short Name	Description	Payment Institute	Currency	(ccount Number	Account Reference	BIC/Swift Code	Default Flag	Cash Account	No. Not Editable	Associated Cash Account	Balance Method

4.4.5 CONNECT NATIONAL BANK CODE TO SUPPLIER (FRFO PAYMENT FORMAT)

Depending on the type of supplier's business, the economic code should be presented in the FRFO file. Use the standard functionality of the national bank code on the *Supplier/Invoice/General* Tab to keep the economic code. National bank codes from E01 to E15 are predefined for France during installation. If needed, additional national bank codes can be entered in the *Financials/Supplier Invoice/Basic Data/National Bank Codes* page. In case this field is empty, the fixed value **E01** will be presented in the file.

4.5 **Create Transactions**

Register supplier invoices and authorize them for payments. Refer to the IFS Cloud Documentation for more details.

4.6 Create Payment Proposals

Use standard functionality to create a supplier payment proposal with payment format FRCO and FRCO.

4.7 Create Payment Order

When the payment proposal is acknowledged, use the command **Create Payment Order** to create the payment order.

According to transactions selected in the payment order, the **Payment Method** should be selected from the list of values. Then click **Finish** to create the payment order.

Financials > Accounts Pay	×		New Payment Order

The output file will be saved to the predefined download folder of the web browser.

4.8 **Delimitations**

N/A

5 B2G E-Invoice (Chorus)

5.1 Overview of Legal Requirement

In France, companies providing goods or services to public entities (hospitals, etc.) have to send their invoices in electronic form using the Chorus Pro portal. e-invoices in several file formats (UBL and Factur-X) can be automatically loaded into Chorus Pro.

The invoices sent to public entities must include a service code. The service codes are specific for each public entity and reflect organization units or cost centers in the company. Each public customer should provide the service codes applicable.

5.2 **Process Overview**

To fulfill the requirement, standard e-Invoice functionality is used as the base. Handling of service code is added to the process.

In a standard e-Invoice solution, an IFS-style data file is created. This can be sent to the Chorus Pro portal or any other tax authority portal through third-party software.

Example:

The process for Project Invoice and Instant Invoice:

5.3 **Prerequisites**

The company must be set up to use the French localization - see the Company Set up chapter- and the Service Code Handling localization functionality must be enabled on the **Company/Localization Control Center** tab.

5.4 **Define Basic Data**

5.4.1 DEFINE SERVICE CODE PER CUSTOMER

Define the service codes for public customers in the **Service Codes per Customer** page. The public customers provide this information.

Financials > Customer Invoice > Basic Da	a > Service Codes per Customer \square		Company FR1CMP						
Sort by 👻	Service Codes per Cus	tomer ABC003 - BonBon 👻

	(i) I Service Code Descripti : 26261001700AAB JOUR - V	on /AUBAN							
	26261001700AAA JOUR - E	SDP							
	Ģ								

5.4.2 SELECT SERVICE CODE REQUIRED FOR PUBLIC CUSTOMER

If the customer is a public entity, the service code is mandatory. Select the **Service Code Required** check box on the **Customer/Invoice/General** tab. From this page, you can use the command **Service Code** to get to the **Service Code per Customer** page and enter the codes for this customer.

5.4.3 SPECIFY ADDRESS ON CUSTOMER

A new receiver address E-INVOICE_FR is added to the customer to identify the French schema used for generating the XML invoice file. For public customers in France, set the *Customer/Message Setup* tab as follows:

Message Class = INVOIC, Media Code = E-INVOICE, Address = E-INVOICE_FR

Application Base Setup > Enterprise > Cus	stomer > Customer > Invoice C

5.5 Create Invoice

Create customer invoices, instant invoices and project invoices using the standard process. If the invoice is for a public customer, use the **List of Values** to select relevant service code connected to the customer.

The Service Code field is added to the following pages:

- Customer Invoice/General tab
- Instant Invoice, use command More Information
- Project Invoice/General tab.
- Customer Order

For a customer order invoice, specify the service code on the customer order, and the value will be fetched to the invoice. If the service code is not specified on the customer order or if an invoice is created for different orders with different service codes, then the **Service Code** field on the invoice is empty, and you have to provide a code directly on the invoice before you can send it. You can change the service code as long as the invoice is in preliminary status.

5.6 Send Invoice

If the **Service Code Required** check box is selected for the customer, it is not possible to send the invoice without the service code specified. An error message is generated. Select the service code from the list of values prior to sending.

Send an invoice using the standard functionality for the customer with the basic data. **Receiver Address** = E-INVOICE_FR set as default method – click on the command **Send Invoice**.

The XML e-Invoice file is placed in the IFS Connect outgoing folder and can be verified from there if needed.

A new tag **<ServiceCode>** is added to the standard e-invoice XML schema in the <BuyerPartyDetails> section. The value from the service code on the invoice is written to this tag.

<buyerpartydetails></buyerpartydetails>
<buyerpartyidentifier></buyerpartyidentifier>

6 Audit File for Tax Purposes - FEC

6.1 Overview of Legal Requirement

All French companies are required to provide the French Tax Administration (FTA) with a Standard Audit File for Tax (SAF-T) called Fichiers des Ecritures Comptables (FEC) on demand, usually before a tax audit. The file is required to contain all accounting entries for a year according to French GAAP, numbered in chronological order by date of accounting with no gaps, including year opening journals related to balances and journals related to all modules (AR, AP, Expense, Fixed Assets, Inventory, Payroll, GL, etc.). The first accounting line entries must always be the opening balance.

Compulsory information to be included in the file is defined by Article L 47 A 1 and the "code des procedures fiscales". There is a total of 18 data elements to be produced.

The audit file must be remitted to the tax inspector in a specific format. The procedural rules for submitting audit files to the tax authorities are as follows:

- Technical: The finalized version of audit files should be saved in either TXT, CSV, or XML format and remitted to tax authorities on optical disks like CD-R/DVD-R (non-rewritable).
- Content: The output file should be generated according to the file structure published by the French Tax Authority (e.g.: The XML file should be according to the XSD provided by the tax authority).

6.2 **Process Overview**

The standard audit file generation flow is used in the solution.

This solution facilitates generating the FEC audit file in either TXT, CSV, or XML format. The XML file considers the XSD file structure related to the general business type (A47A-I-VII-1.xsd format file).

6.3 **Prerequisites**

The following prerequisites should be fulfilled to generate the France audit file (FEC).

- The company must be set up to use the French localization; see the chapter Company Set up. The localization functionality **Audit File for Tax Purposes France (FEC)** must be enabled on the **Company/Localization Control Center** tab.
- To generate year-end vouchers that consist of opening and closing balances for the financial year, run the *Final Year End* process by selecting the **Create Year End Vouchers** option as follows:

Financials > Period Routines > Year End Accounting > Final Year End			
Final Year End			
Company			Ledger ID
REDELKFE CURRBAL - REDELKFE CURRBAL		•	00 - General Ledger 🔹
Selection Parameters			
	From Accounting Year To Accounting Year		
	▼	•	
Year End Vouchers			
User Group	Voucher Type		
•		•	
OK Cancel			

• To fetch all vouchers to the FEC file, run *Update GL Vouchers* and make sure all vouchers in the hold table are updated to the GL.

6.4 **Define Basic Data**

6.4.1 DEFINE AUDIT FORMAT

Open Accounting Rules/ Audit Interface/ Basic Data/ Audit Formats page. Create a new record and enter the Country as France. Select the Report Type as FEC from the drop-down menu. Then notice that the default File Extension would be set to TXT. If the user wants to generate the FEC file in CSV or XML format, the user can change the File Extension from the drop-down list of values. (This File Extension field is only made available for report type FEC).

Other basic data columns available on the *Audit Formats* page are not related to **Report Type** FEC. E.g.: Decimal Symbol, Date Format, etc.

• > Accou	inting Rules > Audi	t interface $>$ Basic Data $>$ Audit Formats $\square C$										Company	DJ's French	Company
Audi	t Forma	ats												
7	+ /											⊕ ~ E ~	24 ~	≣ ~
~	Country		Report Type	Decimal Symbol	Thousands Seperator	Negative Format	Leading Zeroes	Time Format	Date Format	Extension	Іе Туре	File Template ID		Default
0:	FRANCE		FEC	. (point)	, (comma)	-9	0.9	13:59	YY-MM-DD	TXT				Yes

6.4.2 DEFINE AUDIT FILE BASIC DATA

In the *Audit Formats* page, select the record with the above-defined audit format and click the **Audit File Basic Data** command button. This will open the *Audit File Basic Data* page. Create a new record in the *Header* tab and save the data, then go to the *FEC France Setup* tab to view/setup the **General Parameters** related to the FEC audit file creation.

🗧 > Accounting Rules > Audit Interface > Basic Data > Audit Formats > Audit File Basic Data 🛛 🕄

(1) Voucher Type Description							
CA Multi company allocation							

- 1. **Include Statistical Accounts**: Turn on this toggle button to include statistical account type (STATISTIC and STATISTICSOB) data in the audit file with all other account types.
- 2. Account Code Part: Select the code part related French Chart of Accounts from the Code String.
- 3. Exclude Voucher Types: Select which voucher type is to be excluded from the audit file.

6.5 Generate Audit FILE

Step 1: To generate the audit file (FEC), open Accounting Rules/Audit Interface/Audit Interface Assistant. In the Audit Interface Assistant, select one of the below options.

- Start Now: This option enables the user to create an audit file instantly.
- **Schedule**: This option enables the user to create an audit output file via a background job. Find more information in IFS Cloud Documentation. This is the recommended approach since there's a large amount of data to be fetched for the file.

Step 2: Define the following fields.

• Default company will be fetched to the **Company** field. But if required, the user can change the company using the list of values.

- **Country**: FRANCE (would be selected by default if it is set as 'default' on the **Audit Formats** page).
- **Report Type**: FEC (would be selected by default if it is set as 'default' on the *Audit Formats* page).
- Enter the **Period/Date Range** for which the audit file should be created.

Accounting Rules > Audit Interface > Audit Interface Assistant								
Audit Interface Assistant

) Date) Period	1/1/2024	12/31/2024						
Previous Next Finish Cancel			2					

Step 3: Click the **Finish** button to generate the FEC audit file. Please note that the generated audit file would be of the output file format extension defined in the *Audit Formats* page.

6.6 Audit File Output

6.6.1 OUTPUT FILE LOCATION

Go to the location where the generated audit file is placed and open it.

- Start Now: The file will be downloaded through the web browser.
- Schedule: The file can be downloaded via the **Batch Processed Audit Files** page.

• > /	> Accounting Rules > Audit Interface > Batch Processed Audit Files C Company DJ's French Company											
Ba	3atch Processed Audit Files											
ů Ú	1	ب لگ ما	Download Audit File(Background Job ID	5) Load File ID Report Type	Template ID	Audit Source	XML File Name	Text File Name	Created By	🛞 🗸 🖻 🗸 Creation Date	24 ~ XML File	≣ ∽ Text File

6.6.2 DATA MAPPING FOR FEC

Refer the Appendix for details on FEC Data Mapping between IFS and the French Tax Authority guidelines.

6.7 **Delimitations**

N/A

7 Address Specific Tax Registration Numbers

7.1 Overview of Legal Requirement

The French tax authority issues different numbers to registered businesses. Each of these numbers has a different meaning and format as follows:

- **SIREN** number is issued by the Statistical authorities (INSEE), this acts as the business identification number.
- **SIRET** number is made up of 14 numbers. The first 9 digits are the SIREN number, and the following 5 digits are the **NIC** number (Numéro Interne de Classement). The SIRET number provides information about the location of the business in France.

These numbers must be included in tax reports.

7.2 Process Overview

7.3 **Prerequisites**

The company must be set up to use the French localization; see the Company Set-Up chapter. The **Address Specific Tax Registration Numbers** parameter must be enabled.

7.4 Enter Basic Data for Tax ID Types

Ensure the Tax ID Types SIREN, SIRET, and NIC are defined for Country Code FR in the *Application Base Setup/Enterprise/Tax/Tax ID Types* page (standard functionality).

Appl	ication Base Setup	> Enterprise > Tax >	Tax ID Types 🛛 🖯	;

	SIRET 12345678912345							

Note that entering address-specific tax ID numbers for your company will not replace the information entered for Tax Liability Countries in the *Application Base Setup/Enterprise/Company/ Company/Tax Control*, *Invoice* tab. These are separate functionalities.

7.5.2 CUSTOMER

Enter address-specific tax ID numbers for your customer on the *Document Tax Information* tab in the *Application Base Setup/Enterprise/Customer/Customer/Address* page.

An address-specific tax ID can be set as the default by selecting the tax ID and clicking **Set Default**. The default address-specific tax ID will be retrieved for transactions in *Financials/Tax Ledger/Tax Transactions*, *Sales/Order/Customer Order*, and *Warehouse Management/Intrastat Reporting/ Intrastat* pages. Unset the tax ID number as the default by using the command button **Reset Default**.

> Financials > Customer involce > C	Customer > Address 🦪

Note that it's not mandatory to set an address-specific tax ID as the default.

Note that tax ID numbers can not be entered on the upper level if address-specific tax ID numbers are already entered in the nested list. This is to ensure that no duplicate records are entered.

7.5.3 SUPPLIER

Enter address-specific tax ID numbers for your supplier on the *Document Tax Information* tab in the *Application Base Setup/Enterprise/Supplier/Supplier/Address* page.

An address-specific tax ID can be set as the default by selecting the tax ID and clicking **Set Default**. The default address-specific tax ID will be retrieved for transactions in *Financials/Tax Ledger/Tax Transactions* and *Warehouse Management/Intrastat Reporting/Intrastat* pages. Unset the tax ID number as the default by using the command button **Reset Default**.

Note that it's not mandatory to set an address-specific tax ID as the default.

Application Base Setup > Enter	rprise > Supplier > Supplier > Addres	55 (C)

8 CFONB Bank Statement

8.1 Overview of Legal Requirement

French Banking is regulated by the CFONB (Comité Français d'Organisation et de Normalisation Bancaires) and they enforce ERPs to be able to integrate specific bank statements pertaining to CFONB Payment Formats.

The requirement of this legal keep-up is to implement the CFONB Bank Statement in the IFS Cloud for the purpose of reconciliation.

The unique feature of a CFONB Bank Statement is that it contains 4 records, which are the 1st, 4th, 5th, and 7th records. The 5th record is an additional record that represents extra information about the 4th record, which provides data about a particular transaction.

In order to match the additional 5th record, a new record type was introduced to the "BankStatement" system defined external file type as "DETAIL1" and the 1st, 4th, and 7th records will be matched through **HEADER**, **DETAIL**, and **BALANCE** record types respectively.

External File	Type BankStatement - Bank Statement -						
≪ Д ∨ External	File Template External File Type Parameter Definition						\bigcirc
File Type	Description	System Defined			Component		
BankStatement	Bank Statement	Yes			PAYLED		
Api To Call Input		Api To Call Output

Record Type Information						°°°. ∨ [r) ∨	24 × = ×
ប្ Record Type ID	Description	Record Set Identity	First In Last Ii Record Recor Set Set	1 d Mandatory Record	Parent Record Type	View Name	24 ♥
HEADER	Bank Statement Header	1	Yes No	No			
DETAIL	Bank Statement Detail	1	No	No			
DETAIL1	Bank Statement Detail	1	No No	No			
BALANCE	Bank Statement Balance	1	No Yes	No			

The same set of records is defined in the **STDFRBNKSTAT** External File Template as well.

8.2 Process Overview

8.3 Load the Bank Statement

The CFONB Bank Statement can be loaded into the application via *External File Assistant* page. The **File Type** should be set as **BankStatement** and the **File Template** should be **STDFRBNKSTAT**.

Accounting Rules > External File > External File Accistent:									
External File Assistant									
- Set External File Type Set Parameter Values Schedule Schedule Options									
Process Options Chline Process Batch Process									
File Options									
Gie Type Bankdszternent - Bank Statement	erameter Set - Bank Statement Default Set	File Template STDFRBNKSTAT	File Direction InputFile						
上 Drop File to Attach, or in Add File									
4 Previous D Next Rinish Cancel									

8.4 Navigate to External File Transactions

After loading the Bank Statement, navigate to **External File Transactions** and search for the relevant load. The status of the transaction would be "Partly Transferred," and the row status of all the 5th records (DETAIL1 records) will be "Unpacked".

The main reason for this is that through the solution, it was only decided to add the new record type solely for information purposes. Hence, information pertaining to the newly added record type would not be "Transferred," and it will remain as "Unpacked". Also, if the particular txt file contains more than 1 Bank Statement, each statement should be loaded separately to perform the reconciliation accurately.

8.5 **Perform the Reconciliation**

Finally, users can perform the Bank Reconciliation through *Automatic Transaction Matching* or *Manual Transaction Matching* as they intend.

Also, if the loaded file contains more than 1 bank statement, the user will have to remove all the bank statements separately in case it is required to remove the loaded bank statements from the respective cash account.

8.6 **Delimitations**

9 Appendix

9.1 Appendix for French VAT Return (CA3) (Chapter 2)

For IFS Cloud 23R1, existing Template Fields have been renamed and more fields have been added to comply with the French Tax office's requirements applicable from year 2022.

9.2 Appendix for France Audit File - FEC XML Data Mapping (Chapter 5)
